# READY FOR CHANGING

## INCLUDE
We help you make sure that all your key players are at the table and are heard.

## IMPLEMENT
Our program supports continuous implementation throughout the change process.

## INTERPRET
We help you sort through the feedback you receive and the implications for the project.

## ITERATE
We start with small projects and build capacity. We use what we learn to implement large-scale change.

## INTEGRATE
We integrate the change within the larger system so that it is sustainable.

## IMPERFECT
The work is never finished and the change process is always imperfect. Let's get used to it and let's get better at it.
